Moving Business Forward

Introduction

The experts of the experts

With a profound expertise in specific areas of the technology sector, Eurotux has established itself as reference player in the market.

Those who know Eurotux are aware that even the most complex challenges will receive a professional response, which exceeds expectations, instead of just meeting them.

With several reference clients and organizations, in technology, public administration and other sectors of activity, Eurotux's capabilities speak for themselves.

So our customers can focus on what's really important - their business.

Eurotux's strategy relies on the concept of Dependableware. Our proposals focus on security and high availability, providing uninterrupted service, administration and monitoring.

The technical team is composed of highly qualified professionals, in systems integration and administration, and also in software development.

Knowledge, experience and valuable partners are some of the elements that allow Eurotux to adopt a unique market position, responding with innovation to all challenges

Competitive Advantages

Keep things running

Innovation

By maintaining collaborative relationships with researchers, universities and centers of technology, we provide our clients a comprehensive and innovative range of possibilities and the most advanced solutions.

Experience and know how

A technical team comprised of a growing number of professionals, all with extensive experience and expanding skill sets. Qualified, efficient and creative, they see change as an opportunity to innovate and differentiate.

Helping companies reduce risk, control costs, improve performance and streamline their business

24x7 Support

We provide continuous support during all phases in a project, including design, development and operations, with various levels of involvement including non-stop systems with 24x7 support of networks, infrastructure and services.

Our operations center continually strives to ensure the most demanding SLAs are met.

Open Source

Eurotux is a pioneer in the adoption, integration and development of solutions based on Open Source Technologies, which provides cost control, security, performance and flexibility.

International

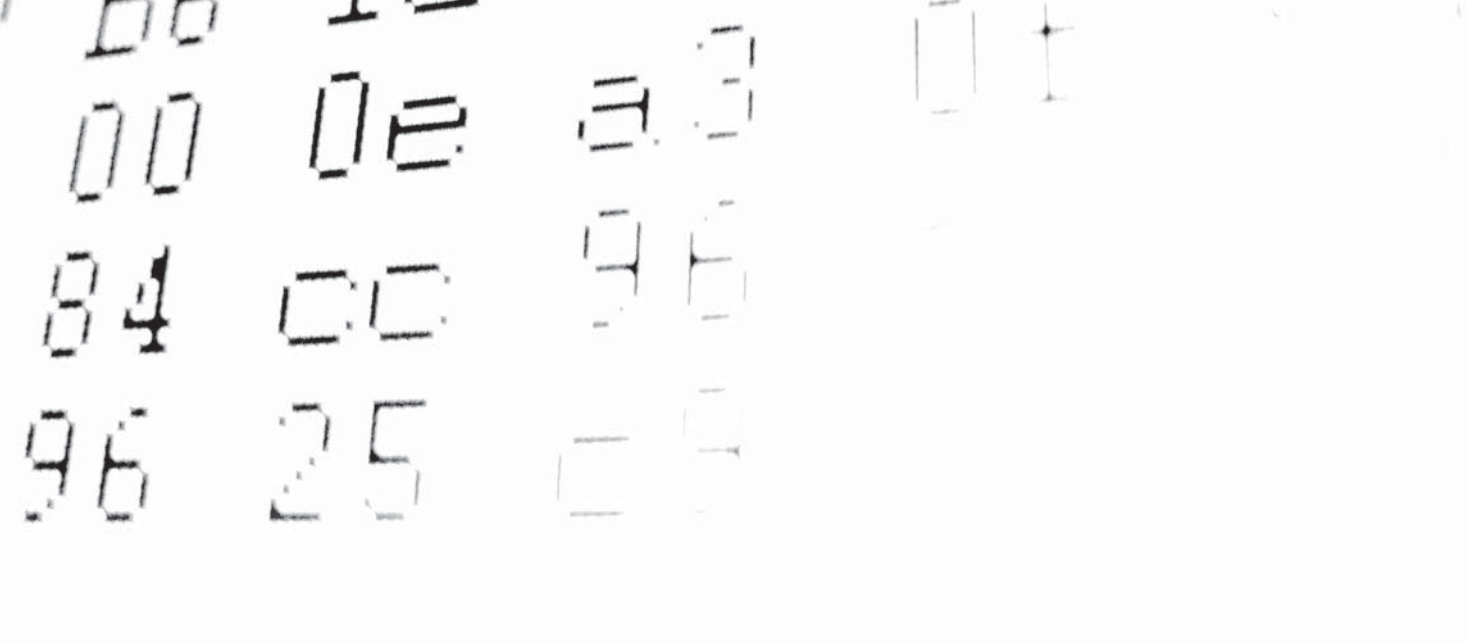
Citius, Altius, Fortius

Since its conception Eurotux has always measured its performance by international standards, providing a level of service that is state of the art.

We integrate and work with the best companies in the market and continually identify and incorporate best practices, knowledge and technologies for the development of business and the creation of value for our customers.

Today Eurotux has partners, infrastructure and businesses relationships on several continents.

Our current projects are in the public and private sectors and have a particular focus on Europe, the United States, Brazil and Mozambique.



Why Eurotux?

- Expertise and skill
- Market proven
- Innovative and competitive solutions
- Strong research and development
- Policy of continuous improvement
- Complete, flexible and scalable service
- Service quality and added value to clients

Human Resources

For Eurotux, investing in highly qualified professionals with a high capacity for work and evolution is essential.

Currently, Eurotux's staff is made up of 40 people, 83% of which have an undergraduate or master's degree in IT.

Evolution

Despite good results, Eurotux continues to focus on improvement processes and work optimization methods, in order to present increasingly adequate solutions and provide a progressively better service.

Growth

During a time of strong contraction in the macro-economic climate, it is especially significant for us to highlight that our results for the last few years, reinforce Eurotux's growth tendency, in terms of revenue, results and financial solidity.

SME Excellence

For the last few years Eurotux has been perennially awarded the SME Excellence and SME Leader status, as acknowledgement for the economic and financial performance of the company, within the framework of a sustained growth strategy.

Server Virtualization

Desktop Virtualization

System Virtualization

Disaster Recovery

Cloud Computing Services

IT as a Service

LAMP, Tomcat, Plone...

The virtualization of servers, systems and desktops is an inescapable reality and contributing factor to the competitiveness of any company.

With experience and a record of success, Eurotux implements virtualization and cloud computing services, enabling cost reduction, increased availability and process automation, combining security and reliability to integrated and flexible solutions.

Without having to resort to large investment and with total security, virtualization and cloud computing are an agile and efficient solution, accessible to all types of businesses.

Development

Web Development

Content Management

Media Solutions

Software Development and Integration

Open Source Solutions

Plone Development

Mobile Apps

The Eurotux development team possesses the knowledge and experience required to deliver high complexity projects, guaranteeing a high level of service quality.

Media Solutions
The Eurotux Media Solution is an open source solution with a proven record with some of the largest national news websites.

Plone Content Management and Development
The solutions developed by Eurotux based on the Plone CMS offer the most advanced content management systems for the web, providing high levels of usability, accessibility, security and scalability.

Mobile Apps
Mobile Apps are an excellent way for businesses to add-value and differentiate by way of innovation. Eurotux has a team that specializes in developing apps for mobile platforms, namely, iOS and Android.

Training

Eurotux Academy

Customized Training

Even when the best systems and tools are used, it is essential to know how to get the most out of them.

This is why Eurotux presents a range of training services, tailored to the specific needs of each company that enables them to maximize the advantage of their solutions.

We feature customized training in open software and security technologies and training in application development using open technologies.

Cloud Solutions

eurotux eBackup

Save and restore your business' files on the Cloud. The eurotux eBackup stores data from laptops, desktops and servers to a specialized remote datacenter, making backup copies automatically and safely so that you can focus on what really matters – your business.

- Source-side deduplication, transferring only new data blocks
- Store backup on a redundant infrastructure
- Off-site replication to a datacenter that is more than 300km away
- In-flight encryption
- Online access to files (via web browser)
- Server backup (supports server applications, e.g., SQL Server)
- Versioning

eurotux eMail Exchange

Email is an excellent communication platform and as such, it becomes absolutely necessary to incorporate protection that maximizes productivity and minimizes threats during its use.

eurotux eMail Exchange is a spam and virus filtering system with quarantine.

The benefits of this system are available without the installation of any equipment or technology at the client, reducing costs and protecting internal infrastructures from external threats.

- 24x7 monitoring
- Security
- Spam filtering
- Commercial and free anti-virus
- Reduces costs of bandwidth and hardware
- Message storage in case of client's server failure
- Scalability
- Ease of implementation

eurotux eTicketing

The eurotux eTicketing is a ticket management system prepared to address the needs of the most sophisticated companies, enabling a group of persons to manage tasks, problems and requests placed by users in an intelligent and efficient manner.

- Very intuitive and adaptable tool
- Fast incident classification and resolution
- Optimizes resource allocation, increasing productivity
- Integration with email

Products and Solutions

eurotux Firewall

The eurotux Firewall is designed to provide a flexible and efficient solution, consolidating network and identification protection, filtering and traffic management in a central system.

- Security and reliability
- Scalability
- Simple and consolidated solution
- Integrated and modular system
- Easy configuration and use
- Layer 7 firewall, proxy, load-balancer, VPN concentrator

eurotux UnitBox

The eurotux UnitBox is an integrated virtualization environment, combining hardware and software into a ready to use solution, that enables the coordinated and centralized creation and management of the most common and useful IT services.

- Includes: Firewall, Email Server, VoIP Server, File Server, ERP Primavera (optional purchase)
- Designed to recover operational status quickly
- Off-site backup for configurations and Primavera database (if included)
- External email filtering
- Available through purchase or lease

eurotux VoIP

The eurotux VoIP incorporates all the necessary features to implement a professional and efficient voice communication solution, including all the features of a conventional telephone system with lower expansion costs.

- Cut back on communication costs
- Allows complete replacement of the traditional voice infrastructure
- Compatibility with a large range of equipment
- Does not require purchase of commercial software license
- Conference calls
- Least-cost routing
- Web interface
- Voice-mail

eurotux Monitoring System

The implementation of monitoring and alarm systems, that can detect the occurrence of failures and accidents, is one of the fields in which Eurotux's services stands out.

- Capability to monitor infrastructures, services and applications
- Adaptable to specific needs
- SMS alerts
- Monitoring anywhere through mobile apps

IBM Power™

System i

Focused on a line of support that ensures balance between prevention and reaction, our technical team is made of highly qualified professionals, able to find and implement the most adequate solution, ensuring a level of service in line with your business.

Open Source Solutions

Enhancing businesses

Since its inception eurotux has developed its activities based on solutions that are open, reliable, and flexible and with a high degree of interoperability.

Following the EU's recommendations for the use of open source software, Eurotux contributes to the reduction of costs and the IT sector innovative capacity of companies.

nuxis

Open Source virtualization solution that combines an easy to use interface with the latest virtualization technology.

Linux

Linux is used more and more often in large servers, mobile devices and apps. It is present everywhere in several platforms and with huge gains and advantages in terms of development, interoperability and scalability.

Plone

Plone is one of the most popular and recognized open source content management systems (CMS). It is ideal for implementing collaborative portals, Intranet applications and event institutional websites, with a considerable emphasis on collaboration, delegation of responsibilities, workflow, accessibility and usability.

Partnerships

Best-of-breed

We seek to incorporate these best-of-breed products and services to our offer, providing the best solutions in the market, having leading companies as partners that offer valuable technological solutions.

Clients

A Win Win Partnership

Since the beginning, our customer base has experienced sustained growth.

The flexibility and high degree of expertise we offer has allowed Eurotux to meet the most demanding challenges our customers bring us.

We establish relationships with our customers, building confidence, helping to pro-actively satisfy and exceed expectations while delivering results.
