

The Nuxis is an open-source virtualization solution combining an easy-to-use interface with state-of-the-art virtualization technology, enabling the coordinated and centralized deployment and management of the more common and useful IT services.

Well-structured and flexible, to get the best performance

The Nuxis is a Linux based virtualization environment, also available as a hardware/software bundle, known as the Eurotux Virtualization Appliance, recommended for most small and medium enterprises.

The virtualization environment is managed via an easy-to-use Web interface, including the coordinated configuration of several pre-installed virtual machines that are available.

## Platform

Centralized web management of both physical and virtual machines

Virtual-network management

Storage management

Installation-image management

Monitoring and usage graphs

Virtual data-center

Supports importing and exporting to other virtualization systems, using the OVF format

Access control

## Virtualization Support

Para-virtualized and fully-virtualized XEN with HVM support

KVM

Can support other virtualization systems: OpenVZ, VMWare, Virtualbox

Based on libvirt, a library that supports the different virtualization systems

UNIÃO EUROPEIA  
Fundo Europeu de  
Desenvolvimento Regional

## Configuration

### PRE-INSTALLED VIRTUAL SOLUTIONS

**Eurotux Firewall** - Network management and security

**Eurotux Mail Server** - High performance mail server

**Eurotux VoIP Server** - Unified communications server, including voice, fax and instant messaging

**File Server** - File server with SSL support

**ERP** - Virtual Machine Windows Server standard, with ERP Primavera solution preinstalled (optional purchase)

### CLOUD SERVICES\*

**Eurotux eBackup** - Off-site backup of virtual-machine configuration and ERP data, aiming for a 1-hour system recover. As an option backup can be extended to any user-defined set of data.

**Eurotux eMail Exchange** - External email filtering for 20 mailboxes (upgrades available)

\* available only when the Maintenance and Support Service is active
