

The Nuxis is an open-source virtualization solution that combines an easy to use interface with state of the art virtualization technology.

Organization and flexibility for the best performance

The Nuxis is a Linux-based virtualization solution, also available as a hardware and software bundle known as UnitBox, ideal for small and medium-sized enterprises.

The virtualization environment is managed by an intuitive web interface, enabling the centralized configuration and management of pre-installed virtual machines that provide a wide range of IT services.

## Plataforma

Centralized web-based management of physical and virtual machines

Virtual-network management

Storage management

Installation-image management

Monitoring and statistics graphs/charts

Virtual data center

Capability for importing and exporting with other virtualization systems, via OVF format

Access control

High-availability

## Suporte de Virtualização

Para-virtualized and fully-virtualized Xen (with HVM support)

KVM

Support for other virtualization systems:

OpenVZ, VMWare, Virtualbox

Libvirt-based development:

support library for other virtualization systems

## Pre-installed Virtual Solutions

eurotux Firewall

eurotux Mail Server

eurotux VoIP Server

File Server and Print Server

ERP Primavera (purchase optional)

## Cloud Services\*

**eurotux eBackup** - eurotux eBackup – Off-site backup for configurations and ERP Primavera database. Pending a service upgrade, the backup can be extended to include other data and contents.

**eurotux eMail Exchange** - External e-mail filtering

\* available while the Maintenance and Support Service is active.

## Service Levels

	BRONZE	SILVER	GOLD
Incidents per year	6	9	12
Software Maintenance	Yes	Yes	Yes
